

ULTIMATE Digital Print enhancement & PROTECTION SYSTEM

Providing ultimate enhancement and protection for your digital prints has never been easier since the introduction of Prismatic Inks *DigiProtect* product range.

DigiProtect has been specifically developed for liquid lamination processes providing compatibility on waterborne, solvent based and UV curing ink technologies whilst making sure that a variety of media including vinyl banners, core flute, timber, plastics or metals are also adhered to and protected.

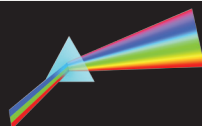

DigiProtect WB Ultimate, 2 Component Waterborne Polyurethane liquid laminate.

DigiProtect UV Ultimate, 100% Solids UV curing liquid laminate.

Prismatic Inks Ultimate Digital Print Enhancement and Protection System offer the following advantages:

- UV protection of the inks and substrate
- Enhanced colour (gloss version)
- Graffiti Protection
- Easy clean surface
- Scratch and wear resistance
- Matt finish available for low reflective applications (DigiProtect WB only)
- Compatible with most inks used
- VOC <100g/L
- Easy application
- Easy water clean up
- Low solvent content
- Satisfied customers
